

Kids' Foot Sizing Chart

Print this document on 8.5" x 11" paper at 100% (full size). Do NOT allow your printer to scale the document to fit printable are. To make sure your size chart was printed correctly, see the accuracy checker below.

Finding the Right Size

With your child's shoes off, place your child's heel along the line at the base of the chart. You may want to keep their socks on for more accurate sizing, but keep the socks snug. The line that touches the longest toe indicates the correct size. Make sure to measure both feet. Rarely are feet the same size. You'll want to purchase the size that accomodates the larger foot.

Remember to allow room to grow!

Growing children will often outgrow their current size within 2 - 4 months

Accuracy Check:

Place a credit card here.

If the credit card fits **inside** this box, your chart was printed correctly.

(Make sure you can see the black outline around your card)
